

***KM200* Blazer**

Katerra has done it once again. The Blazer offers the “Adventurer” size and nimbleness but has added a full manual transmission to handle the extra power and speed. For the rider that wants a little more power and full gears the Blazer has solved that problem with a punch.

A 200cc liquid cooled powerplant and rock solid 4 speed manual transmission give the Blazer the means to take the rider through any terrain you may throw at it. The rear hydraulic and front drum brakes are standard equipment

to stop the rider with ease.

With great torque and horsepower this ATV is capable of carrying full size adults through the trails and keep up with the big guns. The Blazer is the wolf in sheeps clothing!
